Counter-Terrorism Committee Executive Directorate (CTED)

CTED contribution to the report of the Secretary-General on oceans and the law of the sea

looking to exploit the next vulnerability. Introduction of international API and PNR standards in the maritime domain would not be without challenges since the maritime domain presented its own specificities, including the variety of maritime carriers, types of traveller, booking systems, and check-in procedures involved. There are ongoing international efforts seeking to set standards for the transmission of personal data from Cruise Ships, both API and PNR.

11.   In October 2022 during its Special Meeting, the Counter-Terrorism Committee (CTC) unanimously adopted the Delhi Declaration on countering the use of new and emerging technologies for terrorist purposes. Among the listed items in the Declaration include the decision to continue to work on recommendations on the three themes of the Special meeting and the intention to develop a set of non-binding guiding principles to assist Member States to counter the threat posed by the use of new and emerging technologies for terrorist purposes. It is critical that Member States integrate new, emerging and evolving threats into their threat and risk assessments including in the maritime domain. In its resolution 2617(2021), the Security Council noted with concern the increasing global misuse of unmanned aerial systems (UAS) by terrorists to conduct attacks against, and incursions into, restricted commercial and government infrastructure and public( )-626( )-62(a)7(nd)6(s0 y6(t)7(a)Q0.0000088sn,7(e)7(d)-2-6(w)-6(i)02
