planning. This may require new and inventive way technologies. GCRMN should be further strengthe

Further efforts into research and development of it also needed, including increasing the thermal toler. Further research into the cumulative impacts of cli

Emerging issues

Addressing emerging issues will to be important. If *Sargassum* has been washed away on the beaches of changing of ocean temperature due to global clima seaweeds in the regions but the exact cause is unkn Group of Experts on the Scientific Aspects of Mar within their work programme. But further research issue.
