

Intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction

Fifth session

Agenda item 5: General exchange of views

Date of delivery: 26 August 2022

Submitted by the Food and Agriculture Organization of the United Nations (FAO)

The Food and Agriculture Organization of the United Nations (FAO) recognizes sustainable utilization of fisheries resources in areas beyond national jurisdiction cannot be achieved without marine biological diversity conservation.

FAO is actively engaged in areas beyond national jurisdiction through projects and initiatives for which it provides assistance to Member Nations and relevant international organizations.

Technical assistance and capacity development are key factors to support an international legally binding instrument on BBNJ and FAO Members are invited to consider the multidisciplinary portfolio of capacity development programmes implemented by the Organization.

The document FAO and the marine biological diversity beyond national jurisdiction - Information package for BBNJ delegates presents information on the work of FAO that is relevant to the BBNJ process, including ongoing processes and initiatives, and lessons learned, which may be informative and useful for BBNJ Delegates and others. This information may also be a useful indication of areas where FAO may assist Member Nations in the implementation of the future international legally binding instrument.

FAO and the marine biological diversity beyond national jurisdiction - Information package for BBNJ delegates is available at:
