

The First Global Integrated Marine Assessment, also known as the “World Ocean Assessment I”, is the outcome of the first cycle of the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects.

Hundreds of scientists from many countries, representing various disciplines and steered by a 22-member Group of Experts, examined the state of knowledge of the world’s oceans and the ways in which humans benefit from and affect them. Their findings indicate that the oceanshat pressures

The first World Ocean Assessment provides an important scientific basis for the consideration of ocean issues by Governments, intergovernmental processes, and all policy-makers and others involved in ocean affairs. The Assessment reinforces the science-policy interface and establishes the basis for future assessments. Together with future assessments and related initiatives, it will help in the implementation of the recently adopted 2030 Agenda for Sustainable Development, particularly its ocean-related goals.
