number of middle income countries reaching replacement fertility levels and even going below that mark.

Mr. Chairman,

I also stress the importance of the Population Division on the production of data on international migration. This is a priority theme and the Population Division plays an active role not only in terms of data, but also in the promotion of meetings that combine scientists and governments.

Mr. Chairman,

I commend the work of the Population Division in population estimates and projections. It is important to stress the current efforts to develop alternative methodologies for the projection of fortility and mortality.

THANK YOU.
