Chapter 11: International cooperation can help manage irregular migration

and prevent irregular migration from becoming a major problem.

The document on irregular migration from the UN Commission on Migration, Environment and Development

notes that irregular migration may be a risk factor for climate change.

Irregular migration can contribute to climate change by increasing greenhouse gas emissions.

Irregular migration can also contribute to climate change by increasing greenhouse gas emissions.

Irregular migration can contribute to climate change by increasing greenhouse gas emissions.

Irregular migration can contribute to climate change by increasing greenhouse gas emissions.
