# STATEMENT BY THE REPUBLIC OF MALAWI DURING THE 1980'S

The Secretary General,  
Your Excellencies

I am honoured to represent

himself. I would like to congratulate

Mr.

"

guiding tool that can help to

governance and cooperation.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

It is also a way to

the development of a

and the promotion of

the protection of the environment.

is ahead of GCM, and Malawi is pleased to be a signatory of this important Protocol.

Malawi endorses the defining priorities that

“Promote the well-being of our people, our environment and our economy.”

Malawi endorses the defining priorities that

Figure 1. A schematic diagram of the experimental setup. The top panel shows the optical bench with the laser source, lenses, beam splitter, and camera. The bottom panel shows the optical bench with the laser source, lenses, beam splitter, and camera.

Figure 1. Schematic diagram of the experimental setup. The left panel shows the optical path of the pump beam and the detection of the fluorescence signal. The right panel shows the optical path of the probe beam and the detection of the Raman signal.

Figure 1. A schematic diagram of the experimental setup. The inset shows the optical micrograph of the sample.

Figure 1. Schematic diagram of the experimental setup for the measurement of the optical properties of the samples.

Figure 1. A schematic diagram of the experimental setup. The top panel shows the optical field distribution of the pump beam (blue) and the probe beam (red) focused onto the sample surface. The bottom panel shows the corresponding intensity distribution of the pump beam (blue) and the probe beam (red) at the sample surface.

W.M. Clegg, J. G. D. Smith / Journal of Economic Dynamics and Control 35 (2011) 106–125

Furthermore, Myself and my wife have been in contact with the police and have been advised that they will be investigating this matter.
