Amendments proposed by the Global TaskForce of Local and Regional

Paragraphs

4. Despite these gains, many countries, in particular least developed countries (LDCs), still face considerable challenges and some have fallen behind. Inequalities within many countries have

The urban potential for social, economic, and environmental development is insufficiently exploited and investment deficiencies are substantial.

13. Establishing a new platform to bridge the infrastructure gap: Investing in sustainable and resilient infrastructure inclusive and sustainable industrialization and innovation is a pre-

Part of these investments should be directed to growing urban areas, particularly in developing countries, where most of the 1,2 billion urban population growth is going to take place in the next fifteen years. Cities are both the main engines of economic growth and development

and home to extreme deprivation and environmental degradation. An immediate, concrete and direct response is needed to the one billion people living in urban slums.

and sustainable cities

31. We further acknowledge that in many countries, responsibilities for revenues, expenditures and investments in sustainable development are being devolved to the sub-national level and

promote an enabling legal and institutional environment and
