

Achievement of **the Sustainable Development Goals**, a set of international commitments to end poverty and build a better world by 2030, will require significant investment. The SDG Investment Fair brings together governments, the private sector, and financial intermediaries to accelerate **the mobilization of resources for the SDGs**. The Fair provides a dynamic platform for the public

The SDG Investment Fair will hold a mix of sessions that will include exploring opportunities for investments, forging new partnerships and participating in high-level policy discussions.

The Fair will create an innovative and interactive space for participants to discover possibilities for investment, through direct interaction between governments and the private sector, and to learn from country experiences and the work of international actors.
