

Subject: Talking point from Reza COAST / Equity and Climate issues in LDC 5 Co-Chair Meeting  
20<sup>th</sup> May 2021.

1. Together for survival of mother earth Since the Istanbul Plan of Action (IPOA) world is changing rapidly, the threat of two major cause in this regard, first one the climate change.

Key points to be considered in new PoA (i) GCF funding should be 50 : 50 for adaptation, (ii) GCF funding access process should be more easier and easy, (iii) There should be a bar, e.g., minimum 50 % adaptation disbursement to LDCs especially to small island LDCs.

Adaptation and LDC Fund: These two separate window but contribution in here there are no earmarking for LDCs in UN adaptation fund. On GCF, these fund could be a good source for LDCs. Compare to its age LDC fund has 1.26 billion and disburse 1.26 billions, which is very negligible.

In this situation, there should be a discussion toward new PoA at how these two fund could be strengthened.

Patent waiver regime for IPR (Intellectual Property Right) for LDCs LDC has a waiver until July 2021 and pharmaceutical go up to 1

1<sup>st</sup> January 2033.

Developed countries especially US has announce 2 trillion \$ investment in infrastructure development toward employment creation with green technology. LDCs are committed for green technology and willing to zero carbon emission. But its require huge technology, where it's needed technology and know transfer from developed and advance developing countries. New or Doha PoA should have a perusal and declaration in this regard to get financial assistance.
