

Germany welcomes the great efforts in preparing the new Programme of Action for the upcoming 3rd UN Conference on Landlocked Developing Countries (LLDCs). Following the Vienna Programme of Action, we have established a foundation for LLDCs that can thrive sustainably and prosper, particularly concerning trade, infrastructure and connectivity as well as economic development.

Germany is committed to the support of LLDCs and their specific challenges for achieving the Sustainable Development Goals. Without territorial access to the sea, the otherwise heterogeneous group of LLDCs face common challenges regarding international trade, infrastructure and economic development.
