

Covid 19 pandemics brought back food into focus,

Food was exceptionally cheap for a long time,

Now we have a sort of Copernican shift, where everything has changed in the food market,

The price of cereals has increased so much that it's just amazing,

But it is totally natural. Population is on the rise on the planet. Food is always needed. People need to eat.

On the other side you have influence of the environmental protection. On the third side the digitalization,

And we need to find our place in this global process.

From the aspect of Serbia there is no other subject that is more important.

On the other hand from the aspect of national security, food safety is crucial.

So, the whole subject that is being emphasized by the UN and concerns the food is giving us the possibility to see the experiences that other countries have and try to improve our own system.
