

26th UNEN Meeting Minutes
25 October 2023
830- 100am

industrial policies. The brief will assess the potential trade offs and synergies of industrial policies in economic growth, job creation and environmental sustainability, in a range of different contexts. It will contain recommendations for action at various levels. During the discussion, members proposed a number of ideas to ensure the brief could add value in the UN context. These included links to least developed countries, energy policy, technological change and social consequences particularly in relation to gender:
