

The United Nations Office of the Special Adviser on the Prevention of Genocide and the Gariwo Foundation have signed a groundbreaking Memorandum of Understanding (MoU), during the GariwoNetwork 2024, an annual meeting that connects all the actors and partners engaged in raising awareness of the righteous around the world. This agreement marks the beginning of a formal partnership to advance education and advocacy efforts aimed at preventing genocide, war crimes, and crimes against humanity.

This collaboration focuses on raising awareness about genocide and other atrocity crimes (war crimes and crimes against humanity) through innovative tools such as the Gardens of the Righteous, originated by GARIWO. The initiative highlights individuals who took moral stands against oppression, showcasing the power of individual responsibility in preventing atrocities.
