- Now, that the Multidimensional, Vulnerability Index (MVI), has been adopted,
- we expect, that this mechanism, will be effectively, introduced, in the operations, of international, financial institutions.
- Suriname, for instance, a carbon negative nation, with an abundance, in resources,
- is burdened, by significant, financial, and economic challenges.
- We are successfully, implementing reforms, and adopting, innovative strategies,
- to ensure fiscal stability, sound economic, and monetary outlook, sustainable resource management,
- protect biodiversity, and promote, renewable energy, and food security.
- We also, face challenges, such as, inequality, and marginalization, of certain groups,
- including indigenous,

- All of these, are bottlenecks, in achieving, sustainable development.
- The 2030, Agenda, for Sustainable Development, remains our blueprint, for a better future.
- Yet, we are acutely aware, that progress, has been uneven,

- We must transition, from fragmented, and divisive approaches, to comprehensive, inclusive, and transparent, global rule-based, governance structures.
- In an increasingly, multi-polar world, burdened as we speak, by globally, impactful regional conflicts, of war and humanitarian disaster,
- it is, the responsibility, of all of us, to call, for a strengthened, multilateral system.
- One that conforms, with international law, global, humanitarian solidarity, and one, that aims, to achieve global peace, and security.
- One that, will be, a lasting platform, for collective action, and leaving, no one behind!
