

National implementation of the Platform for Action of
Fourth World Conference on Women, held in Beijing in

Introduction

Political objective and purposes of the National Women's Office

The Panamanian State is committed to following up the goals established in the 1995 Beijing Platform for Action through the National Women's Office (DINAMU) of the Ministry of Children, Women, the Family and Youth. As an executing agency, DINAMU coordinates with governmental, non-governmental and international organizations in order to "crystallize" the follow-up mechanisms which will follow up the 1995 Beijing Platform for Action. DINAMU-United Nations Development Programme (UNDP) is the main follow-up mechanism.

the aim of this DINAMU follow-up project is to:

1. Establish a preliminary basis for the creation of national, regional and local follow-up mechanisms for the advancement of women and organizations of civil society.

2. Establish follow-up and coordination mechanisms that will be able to provide training to actors in the implementation of the Platform for Action.

3. Establish the institutional structure of the Platform for Action, and create national and regional mechanisms which do not duplicate human or financial resources to obtain the best results.

In order to establish a linkage between the proposals contained in the Beijing Platform for Action and the United Nations Development Action Plan (UNDP) to provide information on the status and situation of women in Panama.

It was agreed that the organizational and preparatory phases of the Fourth World Conference on Women, held in Beijing in 1995, were character-

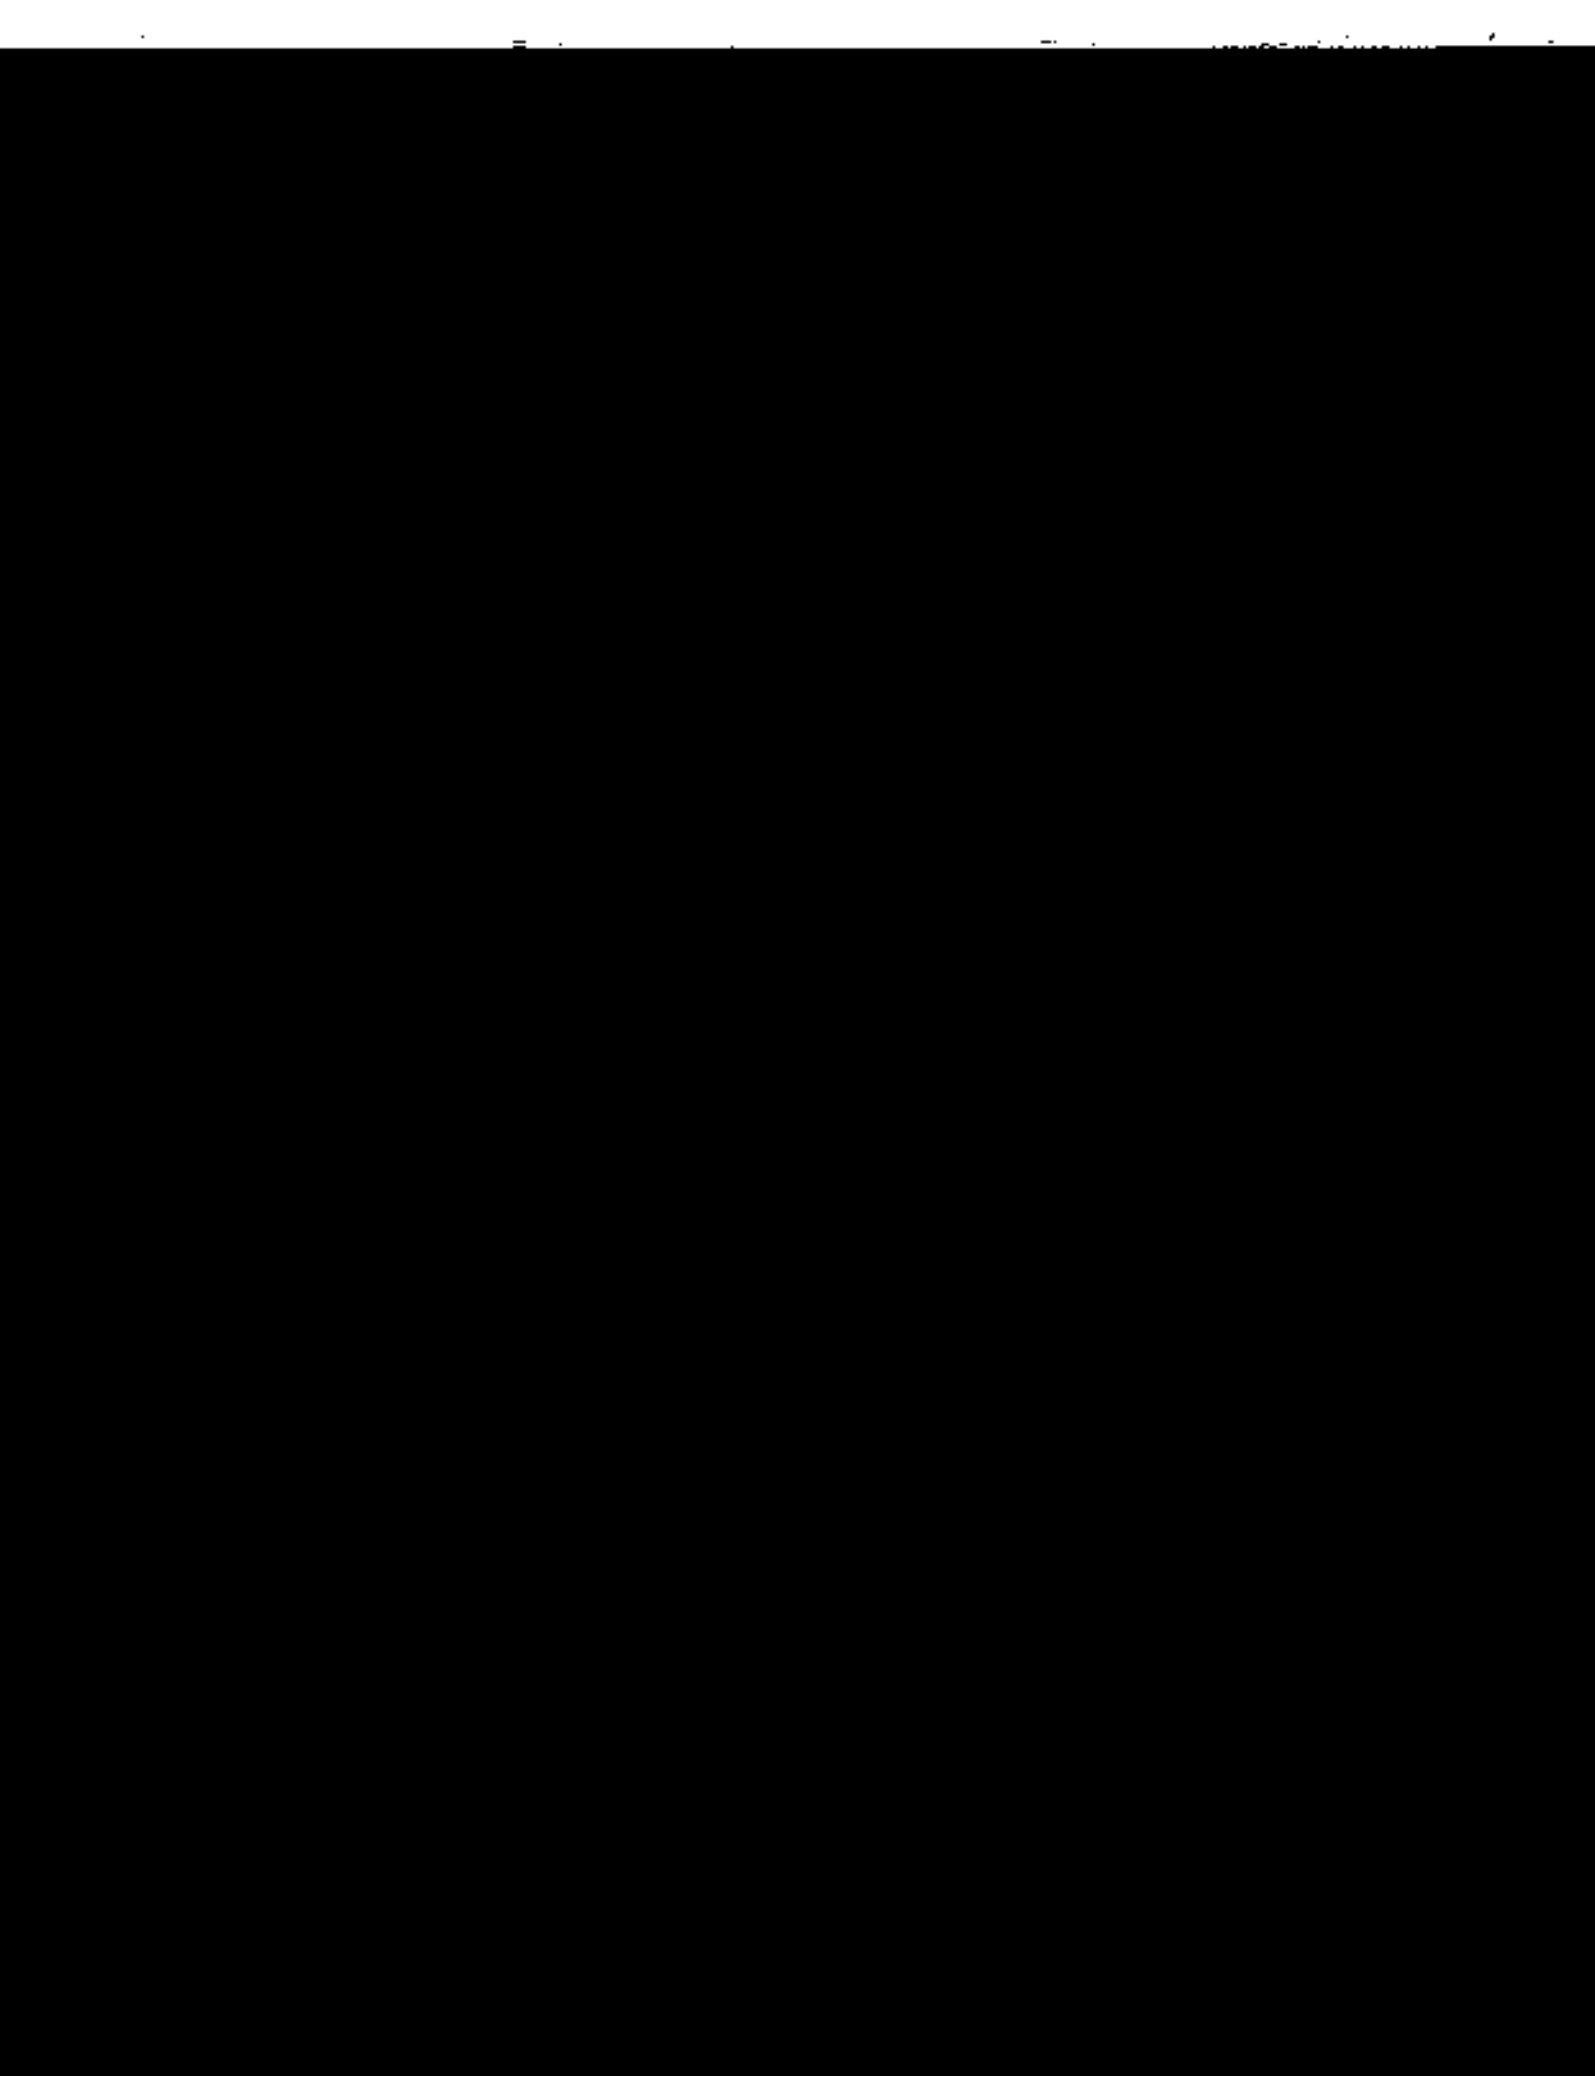

ized by the participation of women from all over the world, both national and international, in various events, both national and international, in the context of the United Nations Development Action Plan.

the women's movement obtained the adoption of Law 27 on the characterization of crimes of violence, its enforcement by the judicial authorities is limited. The law constitutes a major stride, however, which has increased the number of complaints about such incidents.

(2) Please review and change the indicators and/or propose new ones.

_____ School enrolment of rural, indigenous and upwardly mobile urban poor girl children.

_____ Participation of adolescent women in vocational school at the secondary level.

Methodological strategies:

The Platform for Action is an instrument which, by establishing guidelines for action for the advancement of the status of women, helps the Government and the women's movement to undertake follow-up and evaluation. Thus, the Platform is a gauge of the local plans of action and programmes being implemented.

Since women's experience shows that neither protective nor restrictive legislation is sufficient to ensure the realization of their rights, other than that we must organize in order to disseminate and secure the

Indicators

The questionnaire was further improved by the inclusion of a number of indicators taken from the documents consulted. It was completed individually and in focus groups.

Conceptually, a monitoring and evaluation plan is advisable, since it results in greater progress and overall achievement of the desired objectives.

information on the interviewees' general perception of the problems and situations addressed by the Platform. The second part consists of questions elaborated on the basis of strategic actions identified in the Platform under each critical area of concern with the aim of quantifying the relevance and impact of the Platform's components. The questionnaire includes indicators which were evaluated by the interviewees and can be changed, reformulated or replaced by new indicators.

Evaluation report

In the evaluation report, relevance, success and impact were discussed in terms of the answers to the following questions:

(a) Which factors had a positive impact on the implementation of the

programs and which ones had a negative impact? (b) Results and impact for target groups and male beneficiaries and administrators.

Thus, it must be taken into account that the recommendations contained

in this report constitute a proposal for specific action to be undertaken in

the future. The parties responsible for the action should be indicated.
